

DE NEEF®

Leaks Stop Here

Fast. Proven. Durable

DE NEEF®
INJECTION MATERIALS

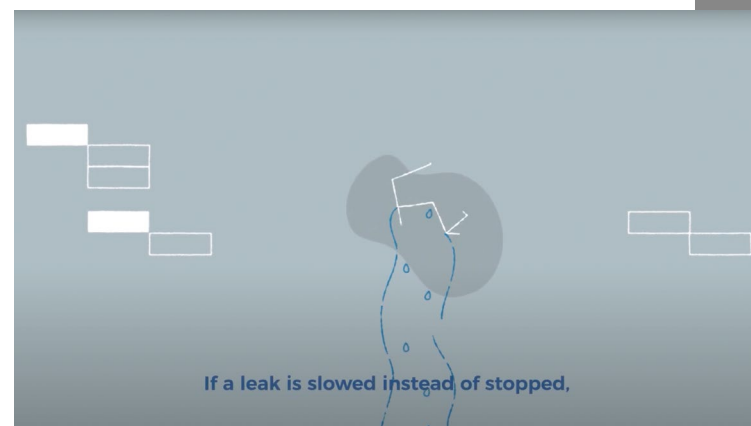

When Money Is Measured In Minutes

Underground construction is a deadline driven-business. Problems that upset your schedule need to be solved FAST.

Short term deadlines shouldn't equal short term thinking. Every minute construction is stopped adds to the cost. When money is measured in minutes, you want the best, most effective, lasting and FAST leak sealing technology.

At GCP, our DE NEEF® injection materials are developed to bring the shortest possible injection cycles and give lasting solutions that reduces the risk of recurrence to the absolute minimum.

- Hydrophobic formulation avoids dilution and product loss during injection
- Balanced viscosity and reaction profiles combine to bring the fastest leak sealing
- > 90% closed cell and no leaching give a lasting stopping effect

WATER CUTTING

Permanently stopping large leaks in underground structures and construction

Leaks Stop Here

Fast. Proven. Durable

CURTAIN GROUTING

Injecting a resin behind the structure to create a watertight wall

LEAK SEALING

Permanent sealing of cracks and joints in underground construction

WATER CONTROL

Injectations to bring emergency water ingress during construction under control so excavation and construction can continue

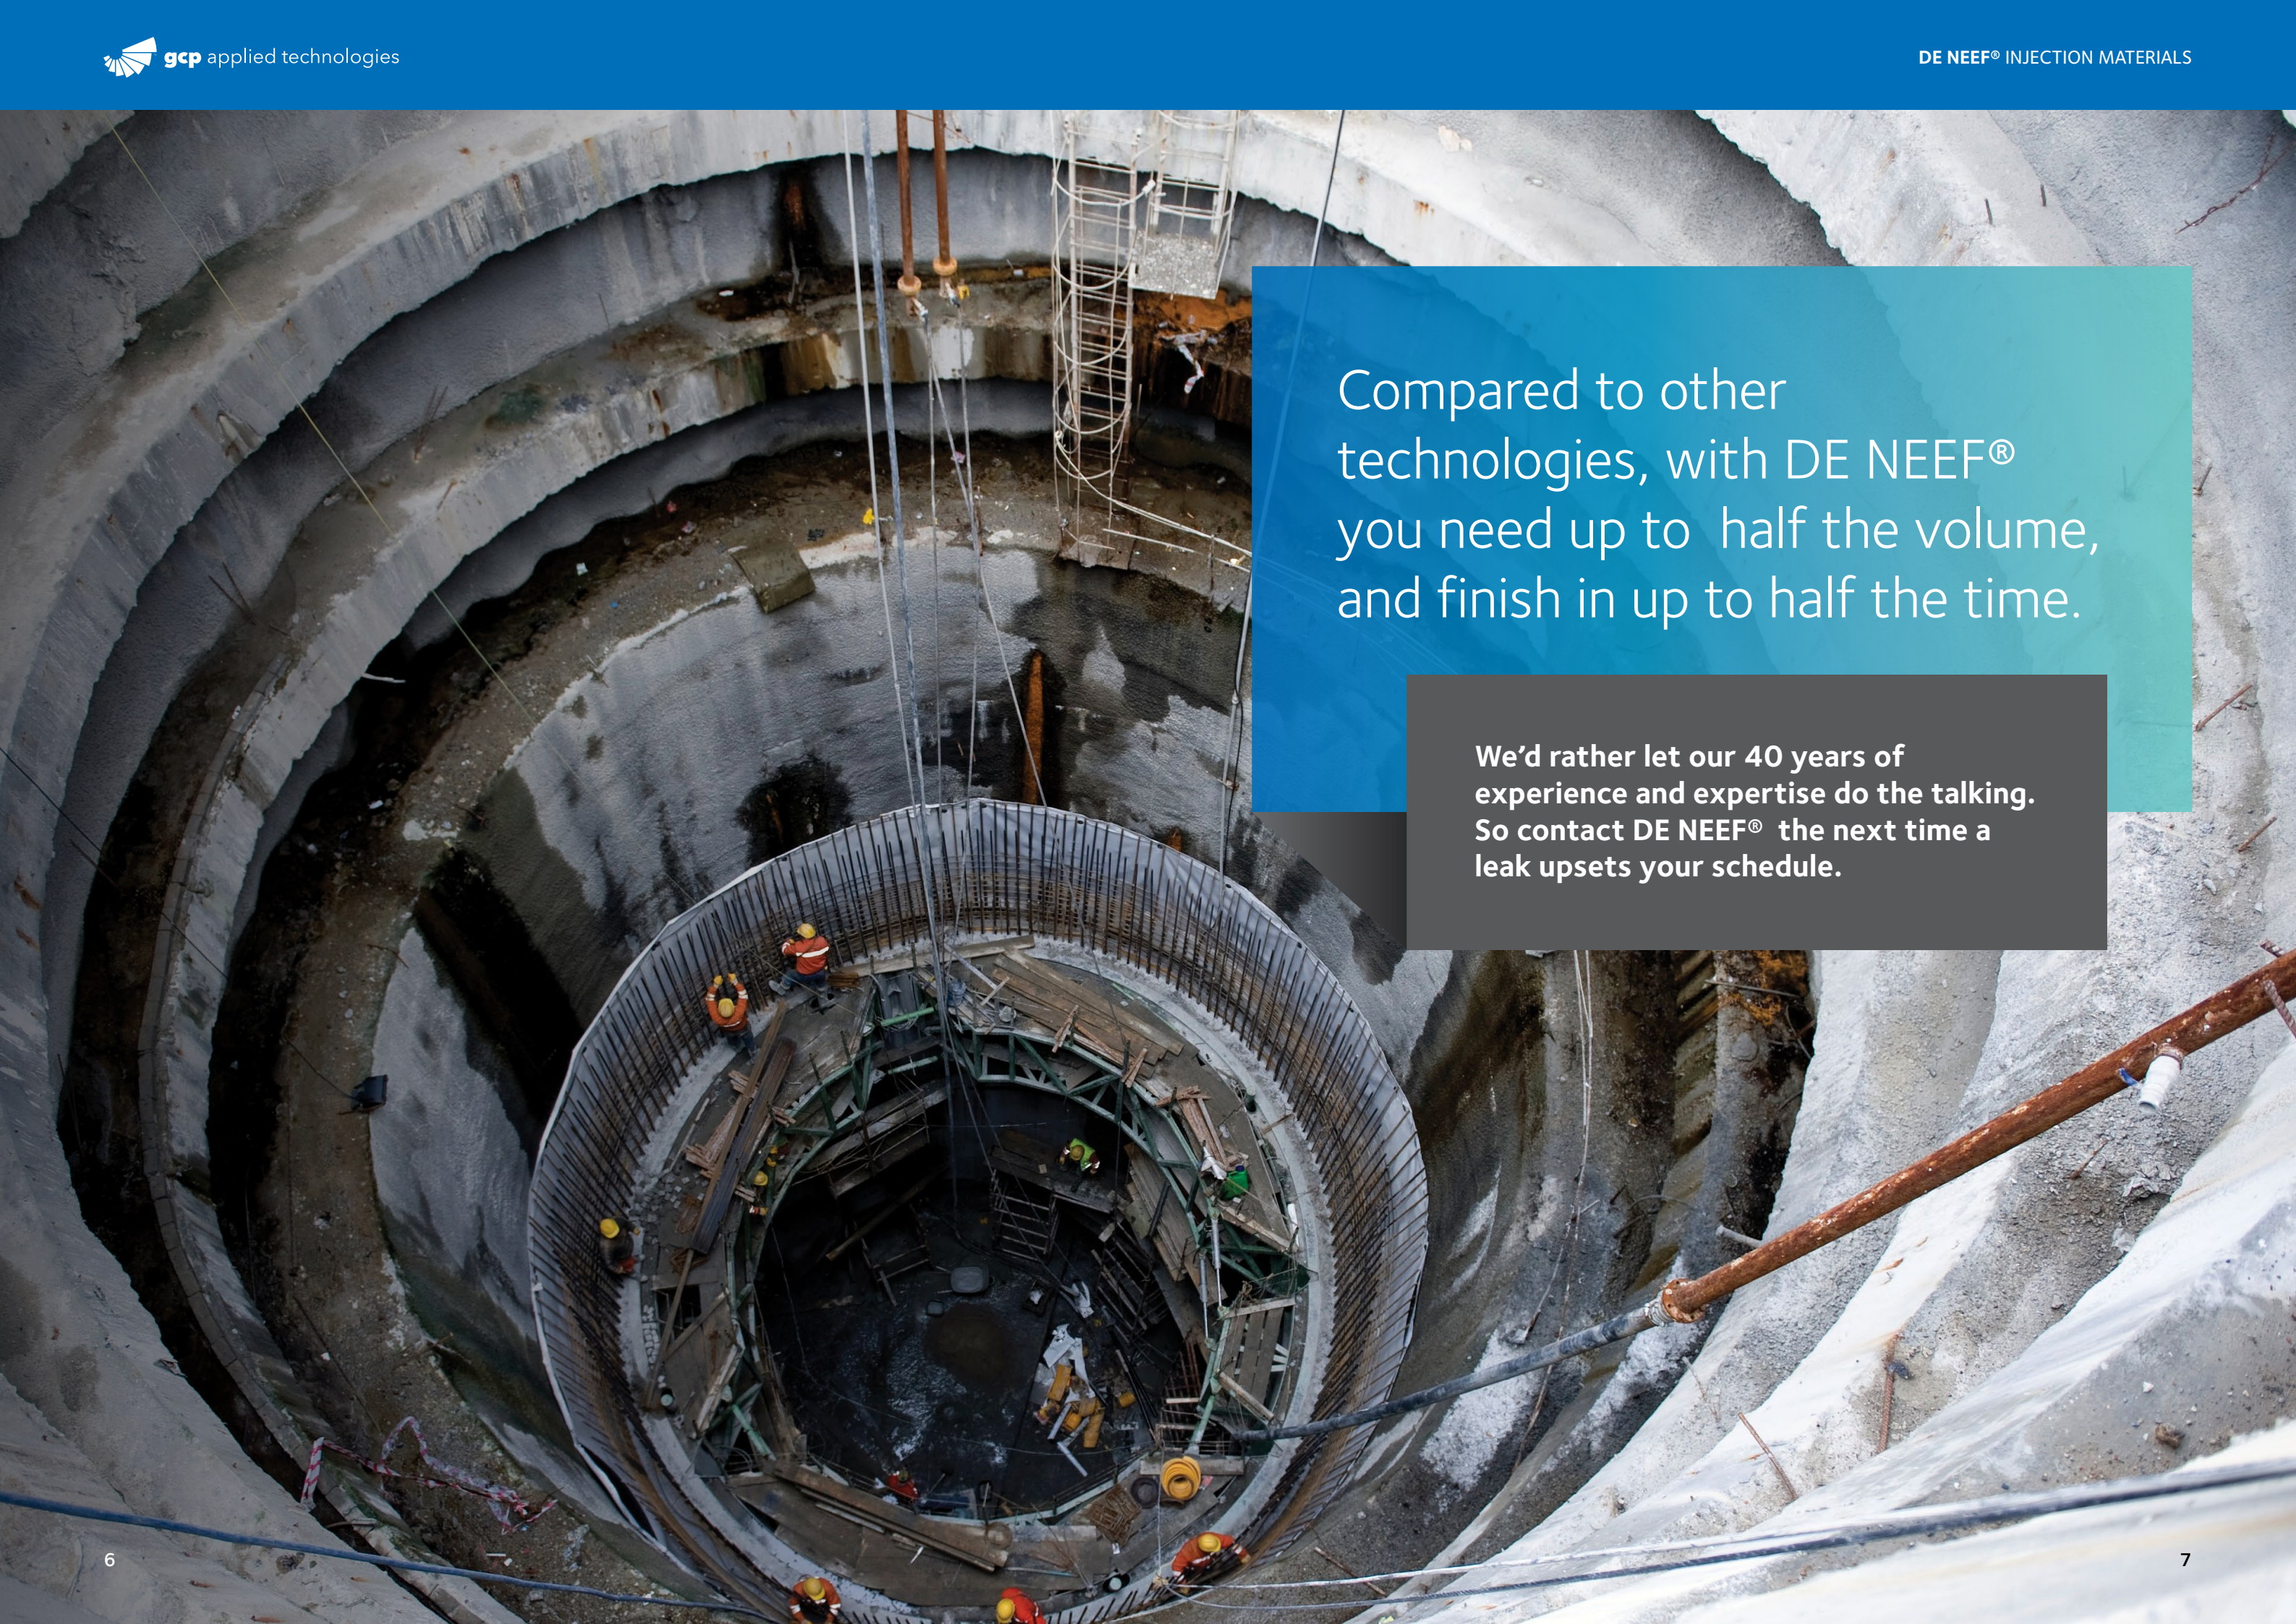

We Have Solutions For All Your Leak Sealing And Water Control Injection Problems

Please refer to our selection guide below for the core DE NEEF® products that provide optimal leak sealing solutions. This list is informative and general. For more information or help with selecting the right solution to your problem or for more information on the DE NEEF® Combi-Block system, please contact the DE NEEF® sales manager responsible for your region or DE NEEF® Technical Service.

Clicking on the product name below will take you to the product page of the respective product where you can download the latest version of the Technical Data Sheet.

	STATIC STRUCTURES	ACCOMMODATES MOVEMENT	WITH VOIDS/BEHIND TUNNEL LINERS	CRACKS > 0.5MM	CRACKS < 0.5MM	BELOW GROUND WATER LEVEL	SOIL	LOW PERMEABILITY BACKFILL
WATER INGRESS IN TUNNELS			DE NEEF® COMBI-BLOCK 					
WATER INGRESS IN DEEP FOUNDATION								
HIGH FLOW / HIGH PRESSURE LEAKS								
CRACK / CONSTRUCTION JOINT / LEAK SEALING								
SPIDER WEB CRACKS								GELACRYL SUPERFLEX AR CE
MASONRY STRUCTURES								
SOIL INJECTIONS TO STOP WATER DISPLACEMENT								
	WATER CUTTING & WATER CONTROL			CRACK INJECTIONS & LEAK SEALING			SOIL INJECTION	CURTAIN GROUTING
	DE NEEF® — SINGLE COMPONENT PU							ACRYLATE

Compared to other technologies, with DE NEEF® you need up to half the volume, and finish in up to half the time.

We'd rather let our 40 years of experience and expertise do the talking. So contact DE NEEF® the next time a leak upsets your schedule.
