

STIRLING LLOYD

# PERMARE<sup>®</sup> SCRIM

Reinforcing Mesh

Stirling Lloyd is now GCP Applied Technologies

---

## Product Description

PERMARE<sup>®</sup> Scrim is a polyester textile fabric.

## Uses

PERMARE<sup>®</sup> Scrim may be used for partial or total reinforcement of the PERMARE<sup>®</sup> waterproofing membrane.

Reinforcement scrim is used to accommodate unusually high degrees of thermal and/or structural movement by increasing the membranes Tear and Tensile strengths.

The increase in these values allows the system to preferentially debond over areas where substrate movement would normally result in system failure, maintaining waterproofing integrity and system performance. Typical areas of use include:

- Day work/Construction Joints in the concrete substrate

## Application

Please refer to the PERMARE<sup>®</sup> Application Guidelines for further details.

## Packaging & Storage

PERMARE<sup>®</sup> Scrim is supplied in 170 metre rolls (approx) cut to a finished width of 195mm.

Do not allow the PERMARE<sup>®</sup> Scrim to get wet. Store in dry conditions.

## General Information

PERMARE<sup>®</sup> Reinforcement Scrim is part of a wide range of specialist waterproofing, surfacing and repair materials manufactured and supplied by GCP. If you require any further information on this or any other of our products, please contact our Customer Services Department or visit [www.gcpat.com](http://www.gcpat.com).

**Certificate Number 15174**  
**ISO 9001, ISO 14001**
